Expertise at a Glance

- **Quality Assuance Experts**
  Agenor's dedicated testing team employs 40+ quality assurance professionals, including ISTQB®-certified consultants. We are highly motivated, results-oriented, and have a passion for constantly improving our processes and workflows.

- **100% Transparency and Control**
  Our approach relies on trust and 100% results visibility. You are always in control, with full access to comprehensive QA reporting, which includes test results, test coverage, quality level and status reports, quality trends, sign-off reports, and more.

- **Comprehensive Testing Knowledge**
  Our consultants are well-versed in all the standard test types and beyond. Whether testing functionality, performance, UI, or localisation, conducting security audits, or deploying new technology — we've got you covered!

- **Business Domain Expertise**
  Over the last decade, our industry-focused network of QA experts have accumulated a wealth of IT and business domain experience. Our particular forte is in FinTech, Local Authorities, Telecommunications, Healthcare, and Utilities.

Testing Services

Agenor Technology offers a complete set of specialised software Testing Services that can be delivered in agile or DevOps environments, maximising the benefits of the Cloud.

Agenor's software Testing Services combine proven methodologies, industry sector expertise, on and offshore delivery capabilities and a strong track record in helping our clients to achieve their strategic testing objectives, and notably lowering the overall cost of testing.

We work through a proven test lifecycle process which is expertly delivered by our consultants, this highly developed process ensures that a structured approach is followed. All stages, associated processes and documentation are presented in a clear and understandable format. These documents and processes adhere to all standard governance and compliance guidelines and can be applied to testing initiatives of any size and complexity.

Test Approach

By engaging with our clients, we offer both static and dynamic solutions within a flexible working model. Agenor Test Teams can integrate seamlessly with the client's governance structure. Alternatively, clients can benefit from our own proven governance model encompassing a suite of custom documentation, tools and processes that increase efficiency and guarantee successful outcomes.

In partnership with our clients, we advise and develop an approach ensuring a close-bonded team. This approach creates productive working practices, effective teamwork, shared goals and defined objectives. Our aim is to maximise value for our clients. Throughout the Testing Lifecycle we issue reports and templates which clients can maintain and re-use within their own teams. We strive to maintain our high success rate of delivery to our clients through structured test stages, aligning to current methodologies.

600 PROJECTS DELIVERED

What We Do

Test Lifecycle

Our approach relies on the ISTQB international methodology, which is used to create optimal test coverage and high-quality test cases, as well as our many years of experience in Testing Services.

The diagram illustrates a typical flow of activities within our testing projects:

Strategy
Defining Scope, Objectives, Approach, Traceability, Metrics, Scheduling, Analysis, Resource

Preparation
Test Plans, Conditions, Scenarios, Cases, Scripts, Execution Schedule, Test Readiness

Closedown
Packaging and Handover to Client

Reporting
Management Reporting, Defect Reporting

Execution
Test Scripts running against Execution Schedule, Raising and Managing Defects

Completion
Test Completion Document, Lessons Learned, Quality Assurance

AGENOR IS:

A Gartner Cool Vendor in DevOps, 2016
