

AGENOR
delivering change, managing risk

AGENOR TECHNOLOGY What We Do

Deployment Management

Key Benefits

- Proven expertise in large-scale complex technology cutovers
- Total focus on reducing the operational risks associated with major changes to key systems
- Expert users of Agenor's ICEFLO cloud-based SaaS cutover solution
- All stages of change planning and execution
- Tailored stakeholder and executive reporting

Deployment Management

Our deployment experts help our clients to execute technology change with confidence. Our consultants give our clients peace of mind by taking full responsibility, not just for the deployment period but the entire build up including planning, stakeholder and technical team engagement.

This knowledge of what makes a deployment successful is essential, particularly where clients are performing events infrequently. Through their experience and expertise, our consultants enhance communications, collaboration and project visibility ensuring clients achieve successful outcomes.

Our collaborative approach is key in reducing the overall duration of technology changes while at the same time significantly reducing the associated risk.

Deployment Approach

Successful large-scale technology deployments are invariably built on the effective collaboration of a broad range of people e.g. IT project / operations teams, 3rd parties and business representatives. Everyone involved has a key role to play. Our collaborative approach is key in successfully deploying change while at the same time significantly reducing the associated risk of failure.

We start by taking full responsibility for the deployment, not just for the cut-over period but the entire build-up phase, including construction of deployment plans, walkthroughs, engaging technical teams and all stakeholders across technology and business areas.

Clients also benefit from adopting ICEFLO, a cloud-based solution developed by Agenor in direct response to the challenges faced by both our consultants and clients. ICEFLO is a real-time Deployment Management solution that enables clients to dispense with cumbersome spreadsheets, war rooms, endless conference calls and the inevitable co-ordination challenges.

AGENOR TECHNOLOGY What We Do

Deployment Types

To get a feel for where we can help, we've listed some examples of complex, large-scale technology deployments.

These scenarios represent real-world examples where the powerful combination of our people and ICEFLO have proven to be effective and successful:

- Datacentre Migration & Optimisation
- Legacy Technology Refresh
- Disaster Recovery Rehearsal
- Business Critical Application Release

AGENOR IS:

A Gartner Cool Vendor in DevOps, 2016
