

AGENOR
delivering change, managing risk

AGENOR TECHNOLOGY What We Do

Programme Delivery

Key Benefits

- Qualified programme and project practitioners
- Programme services tailored to client needs
- Full lifecycle from business case to production deployment
- End-to-end project outsourcing available
- Variety of commercial engagement models

Programme Delivery

We provide teams of highly experienced Programme and Project Managers with proven track records in the areas of project definition, delivery and recovery.

Our delivery teams are staffed by colleagues who have worked and grown together for many years. This means we hit the ground running and deliver value from day one. We focus on outcomes and are motivated to accelerate delivery in every possible way. This is one of the primary reasons clients engage our services on a recurring, long-term basis.

We are committed to delivering specific, clearly articulated outcome-based engagements. Our track record of success means we are confident in our capabilities to deliver our clients' goals at a value point they will recognise - all in a framework of a fixed price.

Delivery Approach

We offer our clients a complete solution. The skills, experience and dedication of our delivery teams are supported by Service Delivery Executives (SDEs) who are themselves highly experienced IT practitioners. They liaise with clients, oversee delivery and ensure that the right mix of people and skills are deployed on each project at all times.

Our services are tailored to individual client needs, from the provision of suitably skilled people for niche areas to large-scale project teams. Our people take responsibility in delivering full projects, beginning with business case through design, build, test and production deployment phases. We are highly experienced in delivering projects of exceptional complexity; we know the exact skillset to deploy to ensure our clients achieve their project outcomes.

As part of our risk:reward approach we offer our clients peace of mind by committing to outcome based programmes of work. This means the client sees a direct relationship between project outcomes being achieved and payment being made.

AGENOR TECHNOLOGY What We Do

Delivery Lifecycle

To help our clients achieve their goals and maximise value, we work through a proven Project Management Lifecycle which is expertly delivered by our consultants.

This highly developed lifecycle ensures that a structured approach is followed at all times.

All project phases and associated documentation are delivered in industry standard and understandable formats. These documents adhere to all current methodologies and are used for programmes and projects of any size and complexity.

AGENOR IS:

A Gartner Cool Vendor in DevOps, 2016

The second fastest growing tech company in Scotland in Deloitte Fast 50 UK, 2015

Ranked in the Sunday Times Tech Track 100, 2015
