- Variety of commercial engagement models

Technical Services

Agenor assemble multi-disciplinary teams spanning a wide range of technology skill sets to meet the full requirements of complex, large-scale technology projects.

We provide expert practitioners across a full range of skills and experience – from Strategy and Architecture consultants to BAU technical operations.

Many of our Technical Specialists have worked together for several years, complementing each other's skills and knowledge. That shared background means we can hit the ground running and expedite Programme Delivery.

Our Technical Specialists all have significant experience of operating in production environments and have proven experience of the deployment phase of any project. As part of our integrated approach to delivering services, our team members are expert end-users of our ICEFLO Deployment Management solution.

Technical Approach

Our experience enables us to quickly and effectively collaborate with clients' existing technical staff, respecting internal processes and operating procedures. Flexibility is at the core of our proposition and operating model.

Our Technical Specialists have the experience to operate effectively and maturely in an enterprise context, with acute awareness of service risk and change governance. Our senior professionals are paired up with more junior members of our team to provide mentoring, pragmatic education and quality assurance.

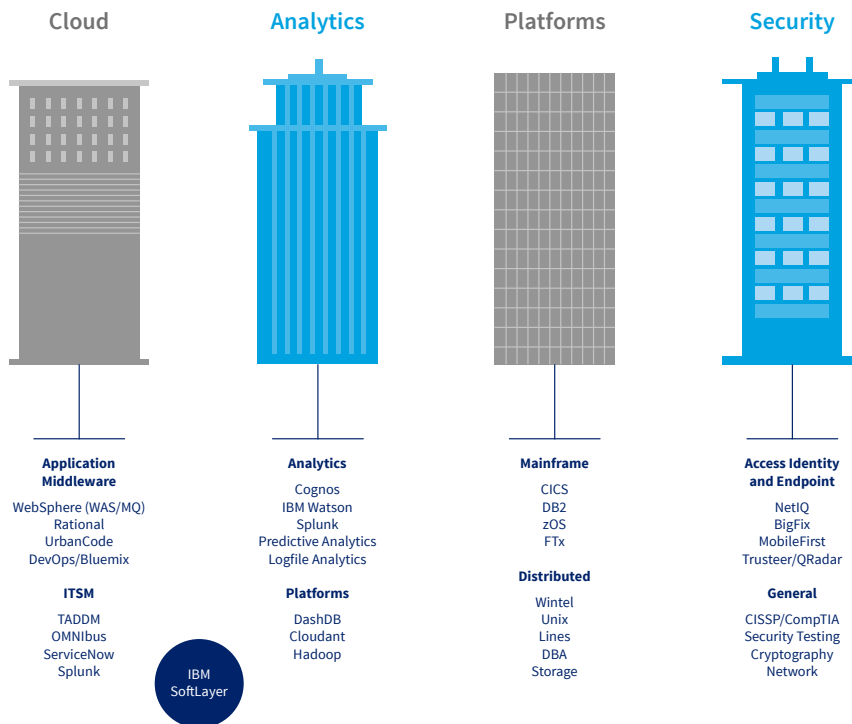

Agenor Technical Services can be delivered on a client's site, in a traditional manner. Increasingly, our clients are taking advantage of advances in technology and our ability to remotely deliver these Technical Services from our own, secure office locations.

AGENOR TECHNOLOGY What We Do

Technical Capabilities

Our portfolio showcases the range of capabilities that we have within Technical Services, including

- Cloud
- Analytics
- Platforms
